Asking For Assistance

Voice Over	On-Screen Visual
<p>Poll Workers are always available to provide you with any assistance you may need.</p>	 A group of four people, three women and one man, are gathered around a dark wooden table. They appear to be preparing materials, possibly for a poll station. An American flag is visible on the wall behind them. One woman is holding a large yellow bag, and another is looking at a document on the table.
<p>They will be stationed in various areas in your poll site, including the area near the AutoMark, for easy access to you, should you need or want their help.</p> <p>Pollworkers are always on hand to provide instruction, or when requested by you, to assist in the use of this equipment as directed by you.</p>	 A man in a white shirt and tie is standing and holding a small device, possibly a mobile phone or a small tablet, while looking at a woman seated at a desk. The woman is wearing a purple shirt and a headset, suggesting she is a poll worker or a voter using assistive technology.
<p>After you have completed sign-in, you'll need to select which voting machine works best for you.</p>	
<p>The AutoMark voting machine has several features that are available to any voter who needs them.</p>	 A man with long hair and glasses, wearing a purple shirt, is sitting at a desk. He is looking towards the right side of the frame, possibly at a computer monitor or another person. He has a slight smile on his face.
<p>These features, such as providing audio messages through the use of headphones, and provides access through Sip-N-Puff devices, tactile controls and, where provided voting paddles, are available to any voter.</p>	 A close-up shot of the same man from the previous image. He is wearing a headset with a microphone and a Sip-N-Puff device. A hand is shown adjusting the device on his face. The Sip-N-Puff device is a small, white, rectangular device that is used to provide tactile feedback to voters who are blind or have low vision.
