

# Scanning Your BMD Ballot

<b>Scanning Your BMD Ballot</b>		
<p>Once you have completed your Accessible Voting Session, you may insert a ballot into the scanner with or without an Audio/Visual Review.</p>		
<p>If you prefer to do the review, you <i>must</i> let the Inspector know prior to inserting the ballot into the scanner.</p>		
<p>This is so the Inspector can program the ImageCast to provide you with an Audio/Visual “independent” review using the same devices and assistive choices as when you voted your ballot.</p>		
<p>You can now insert the privacy sleeve into the input slot on the scanner at the other end of the machine.</p>		
<p>If you need assistance, please advise your Inspector, who will be able to do this for you.</p>		
<p>When your review is complete, you can either cancel or cast the ballot.</p>		
<p>If you choose the cancel the ballot, it will be returned to you, a replacement ballot is issued, and a new Accessible Voting Session is created.</p>		
<p>Once you choose to cast your ballot by choosing the <b>Select</b> option on the accessible device or scanner, the scanner automatically counts and stores your ballot in the ballot box.</p>
